MF 3600 Series: New features that make a big difference

With the introduction of Electronic Linkage Control (ELC) and a new vertical style exhaust, these small but essential additions to the MF 3600 Series specialist tractor range makes them the right choice on any smallholding, vineyard or farm.

MF 3600 Series specialist tractors are versatile, agile and effective - the perfect tractor for smaller businesses and specialised applications. Municipalities, contractors, livestock and dairy farmers, growers of vines, olives, soft fruit or nuts, can all benefit from this comfortable, compact and practical machine.

By introducing the optional Electronic Linkage Control system (ELC) we are taking productivity to the next level. This essential feature will enable customers to use their linkage system precisely and effortlessly.

Available on both cab and footstep versions, the new ELC system initiates faster, more accurate operations simply by the push of a switch.

This new system means that the repetitive action of lifting and lowering implements is significantly reduced, allowing for a more comfortable and

productive day's work. Fender mounted switches allow for external operation of the linkage for quick and easy implement attachment.

Controls are uniquely integrated into the armrest and are positioned ergonomically to ensure that the operator is within easy reach of all the controls.

The control panel houses all of the rotary switches including:

- Depth/Height of work
- Draft/Position/Intermix
- Rate of lowering
- Maximum lift height
- Rocker switch for neutral position for lifting and lowering
- Button switch for quick soil engagement

All rotary switches for the Electronic Linkage Control system are mounted under a hinged cover allowing access to less frequently used switches.

It also ensures that the linkage controls can be locked for safety.

New vertical exhaust

A new vertical exhaust system is available on MF 3600 Series V, S, F and GE models as an alternative to the current down-swept system.

Although the exhaust emissions from MF 3600 Series tractor engines are low, this new design will ensure that gases are directed away from precious crops such as grapes and hanging fruits.

This new positioning of the exhaust also reduces noise levels within the cab for added driver comfort.

Our promise to you

Our mission at Massey Ferguson, since the company was founded, has been to design, engineer and manufacture reliable, trustworthy and innovative machinery. Machinery that people recognise the world over.

VISION

Our vision for the world of agricultural machinery has always been clear; to produce worthwhile and innovative solutions for professional farmers feeding the world. Always recognisable, the Massey Ferguson brand of products signifies technological advancement, enhanced design, strict testing and quality manufacturing which is consistently trustworthy and hardworking.

INNOVATION

We've always been one step ahead when it comes to innovation. Our founder, Harry Ferguson is proof of that.

Through continual questioning and analysis of customers' needs, our products are designed, tested and built to enhance productivity, efficiency and convenience, constantly pushing the boundaries of farm machinery.

From the simplest push of a button to technological innovations in engine and transmission efficiency, we strive to make life simpler for the operator.

LEADERSHIP

Massey Ferguson machinery is the most widely sold agricultural product in the world, making us the leaders in the agricultural arena. We've won awards for our class-leading technology and advancement in design and we're already driving ahead, environmentally and economically.

QUALITY

It takes certain distinctive attributes to make a quality product. At Massey Ferguson, this distinction starts at the drawing board and doesn't stop. Every stage of manufacturing, from the building and testing process to sourcing the best components, demands excellence. Our products and services meet the most stringent standards allowing us to deliver our promises, confidently.

RELIABILITY

We don't let a Massey Ferguson machine out of our sight until we are 100% sure it will perform to the high standards you expect. Only after rigorous and painstaking testing both in simulations and in the field, will we allow our products to leave the factory. Whatever you put your tractor through, day after day, season after season, we can guarantee we've already tested those limits and gone beyond them.

SUPPORT

Agriculture can be a tough business, that's why we make sure that you can get support whenever you need it and at crucial times of the year. Be assured of sustainability from more than 3,200 dealer outlets in over 140 countries and a comprehensive machinery distribution network. You'll be part of a dedicated family of specialists who make it their business to give you genuine, top quality service support.

Equally, we won't let an opportunity slip through your fingers. If you have the commitment but not necessarily the financial resources to compete in today's market-driven climate then AGCO Finance could have the solution. Ask your local dealer for more information.

Financial options are market specific but can include leasing, hire purchase, contract hire and loan facilities.

PRIDE

Pride means many things to us at Massey Ferguson. It's in everything we do and it shows. It's in our proud heritage, our unique product design and our ongoing support to our customers.

COMMITMENT

We are deeply committed to delivering the highest of expectations and to build quality, reliable products with innovative features that are backed by the best support packages. Ultimately, we are committed to continuous growth and profitability for all, whilst recognising the needs of both large and small businesses through professionalism and quality.
